EXECUTIVE SUMMARY

The Veera Group Employee Manager System is designed for modern enterprises and medium-sized businesses who want to manage their human resources seamlessly without the complexity of traditional, fragmented software. Many organizations face problems like manual data entry errors, payroll mismatches, and no central record of employee performance or leave. Our app solves these problems in a unified, cloud-powered, and affordable way.

With this app, business owners and HR managers can:

- Manage all employee records and profiles in one central place.
- Generate automated Employee IDs (e.g., VVT0001) for professional branding.
- Calculate payroll and salaries automatically without manual bookkeeping.
- Get real-time reports on attendance, leave status, and payroll distribution.
- Work securely – powered by Supabase Cloud, the data is accessible anywhere with a reliable connection.

The app is designed with a sleek "Glassmorphism" interface and intuitive buttons so that even people with little technical knowledge can use it. It is more efficient than traditional spreadsheet-based tracking and provides enterprise-grade features on a simple web platform

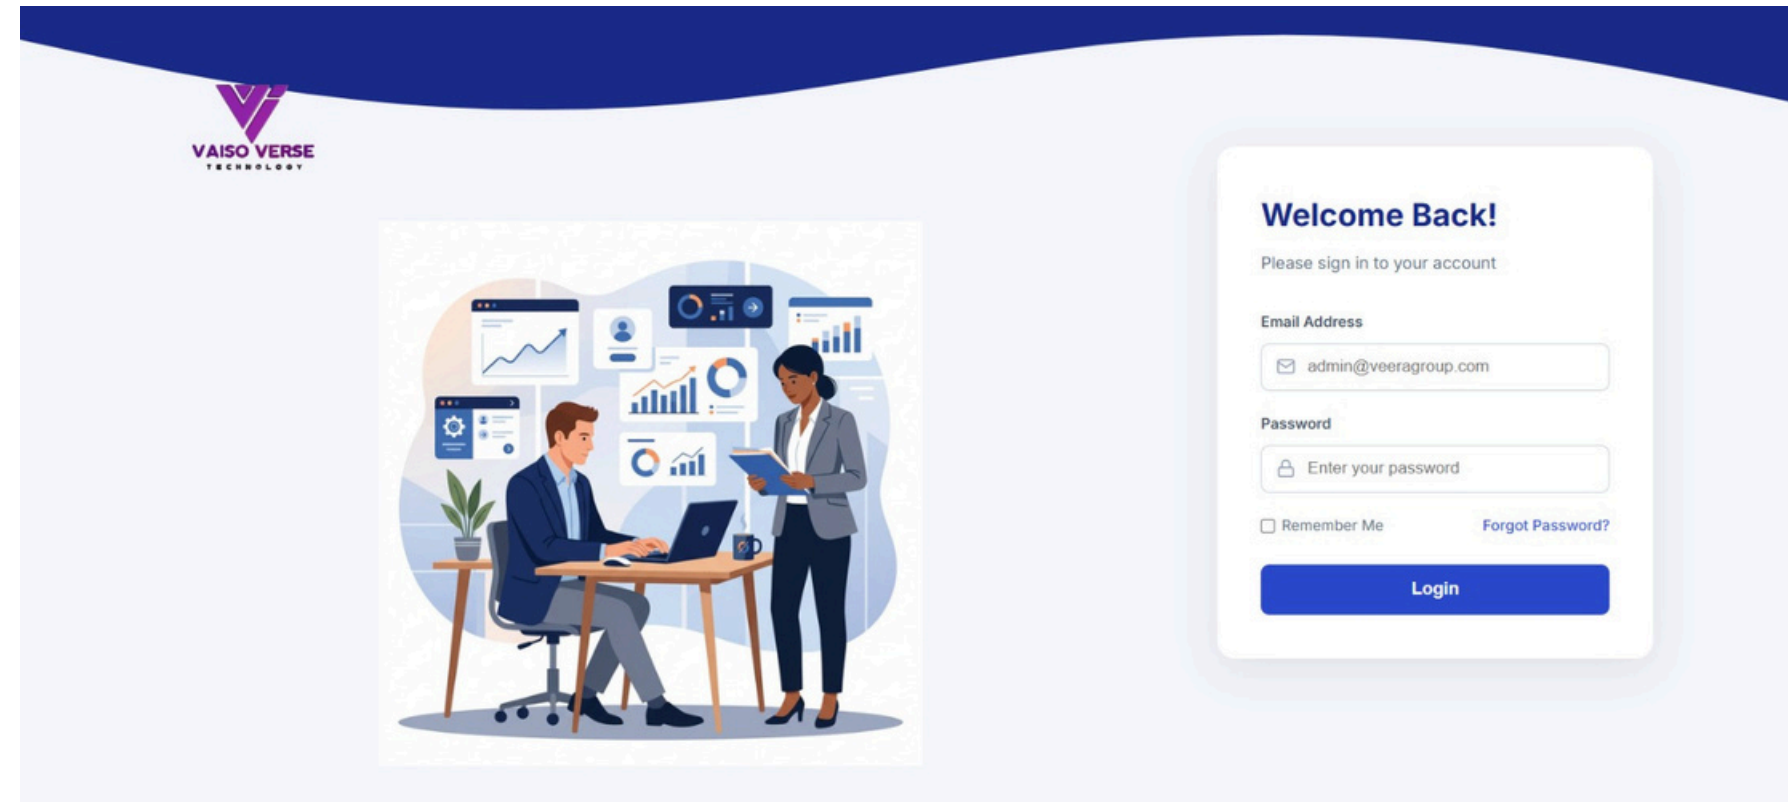

Key Benefits:

- Cloud First: Secure data storage on Supabase (PostgreSQL) – no local data loss.
- Automated IDs: Intelligent generation of unique Employee IDs.
- Precision Payroll: Automatic calculation of allowances, deductions, and net pay.
- Intuitive UI: Easy to use – no technical training needed.
- Data Export: Instant export to professional Excel and PDF formats.
- Scalable & Secure: Grows with your business, from 5 to 500+ employees.

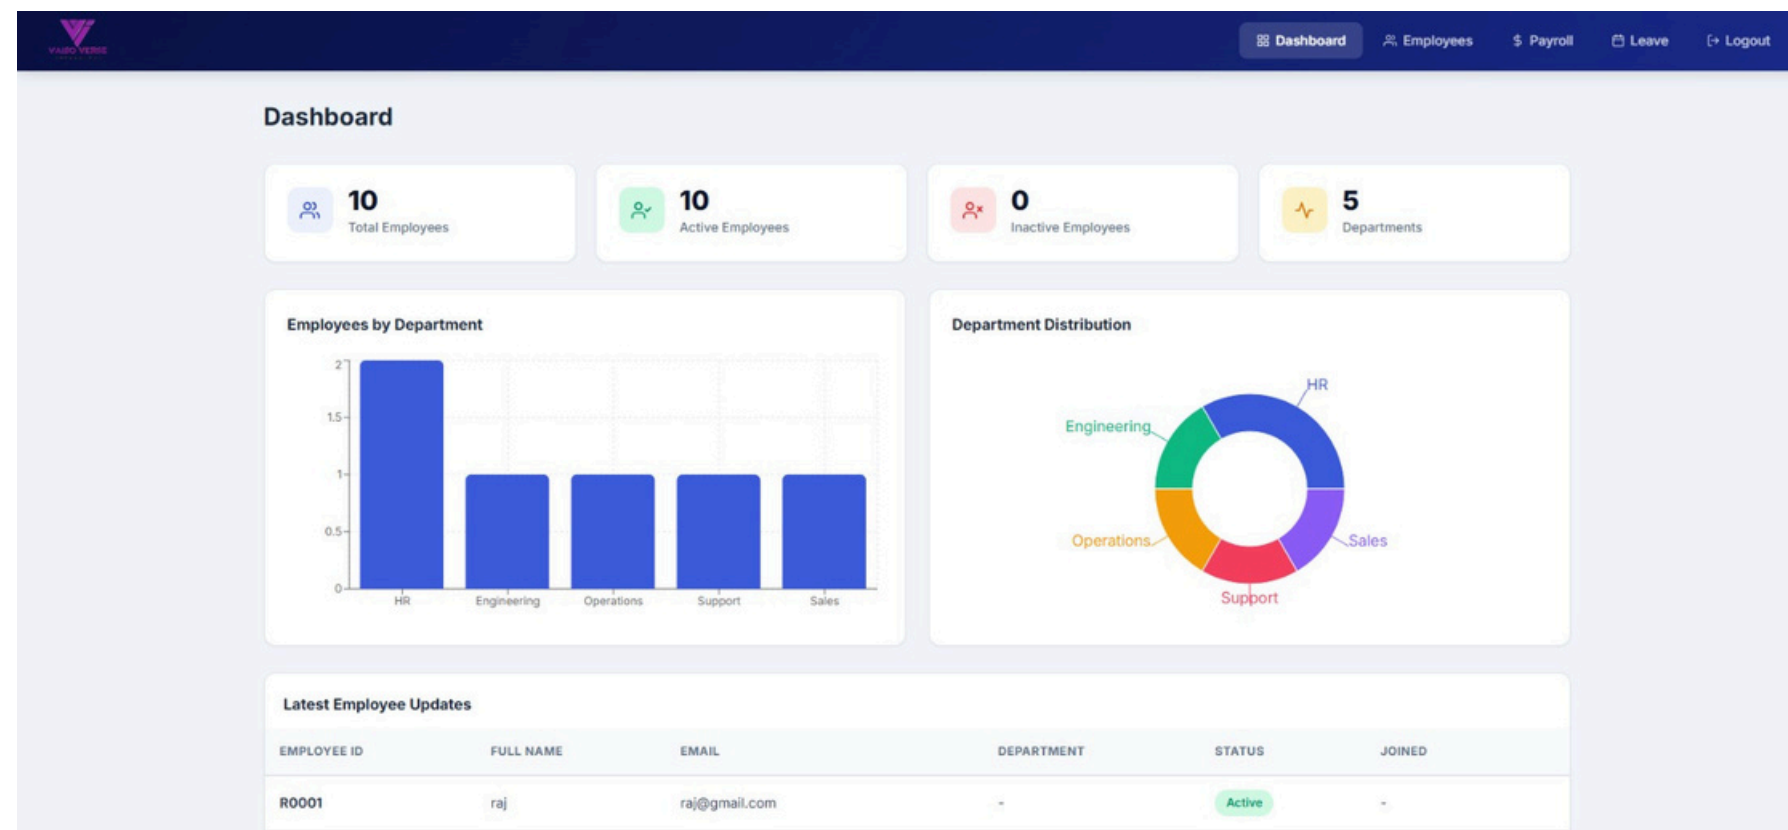

Product Features:

- Employee Profiles: Add and edit detailed employee data, departments, and roles.
- Interactive Dashboard: Real-time stats and visual trends using Recharts.
- Payroll Processing: Manage salary structures and generate payslip data.
- Leave Management: Digital request and Admin approval workflow.
- Global Search: Quickly find employee records with advanced filtering.
- Role-Based Access: Secure login for Admin (Management) and standard users (optional).
