EXECUTIVE SUMMARY

The Retail Management Offline Mobile Web App is made for shopkeepers and small businesses who want to run their shop smoothly without depending on the internet. Many small shops face problems like slow billing, stock mismatches, and no proper records of sales. Our app solves these problems in a simple and affordable way.

With this app, shop owners can

- Manage all products and stock in one place.

- Make bills fast and give invoices to customers.

- Record sales and purchases without writing in books.

- Get reports of daily and monthly sales, profits, and top-selling items.

- Work fully offline – no internet is required, so the app works even in areas with poor or no connectivity.

The app is designed with a simple screen and easy buttons so that even people with little computer or mobile knowledge can use it. It is cheaper than traditional POS machines and gives more features in a mobile phone itself.

This app helps shopkeepers save time, reduce errors, and grow their business with clear reports and better control over stock and sales.

Key Benefits for Customers

- Works 100% offline – no internet required

- Quick billing & invoice generation

- Automatic stock updates

- Easy to use – no technical skills needed

- Daily & monthly sales reports

- Affordable and secure
